

Cybersecurity Symposium

Practical tips and strategies to help you recognize and avoid common cyber threats. This community event, in partnership with Microsoft, is designed to provide the essential knowledge you need to protect yourself and your loved ones in the digital age.

Whether you're an individual seeking to enhance your cybersecurity skills or a business owner looking to safeguard your business from online threats, this symposium offers valuable insights for everyone.

This event is **free and open to all community members**, with no prior cyber or technology knowledge required.

Jay Larson
Chief Information Officer

Jay holds degrees in Computer Systems Networking and Network Design and Management, along with a diploma from the Arizona Institute for Healthcare Leadership. He is a Certified Information Systems Security Professional, one of the most respected certifications in his field. Jay has served on various panels and committees and is currently part of the Infragard Joint FBI and Private Sector Partnership to improve American cybersecurity.
