- 15-minute 4D session
- 5 color photos

For all the expectant parents out there, you can now see your unborn baby clearer than ever before and in live motion. We use state-of-the-art Siemens 4D Ultrasound technology to bring visuals of your baby to life with a clarity that is impossible to achieve with traditional ultrasound. Watch as your baby smiles, yawns, blinks, and moves its fingers and listen to the heartbeat. You can actually see what your baby is going to look like before he or she is born!

Make memories that you and your loved ones will cherish for a lifetime. Call 928-537-6700 today to schedule your 4D ultrasound package.

**Must have had 20 week anatomy scan prior to 3D/4D session.*

4D ultrasound is not intended for diagnostic purposes, but rather for memories only. The ideal time for a 4D ultrasound is between the 28th and 32nd weeks of pregnancy. 4D ultrasounds are not covered by insurance, payment is required at time of service via cash, check or card.
